Education

Worcester Polytechnic Institute (WPI), Worcester MA Expected Graduation: May 2029
B.S. Electrical and Computer Engineering
B.S. Robotics Engineering
Relevant Coursework: Sensors, Circuits, and Systems, Digital Circuit Design, Communications and Networks, Introduction to Robotics, Embedded Systems, Independent Study: Custom Satellite Rotator
Activities: Tech News (News Editor and Op-Ed Editor), Crimson Key (Tour Guide), WPI Office of Undergraduate Admissions (Summer Associate), Student Government Association (Honorary Senator and Student Affairs Committee Member)

Skills

Design: SolidWorks, Fusion 360, Onshape
Programming: Kotlin, Java, Python, C, Claude Code, Codex
Fabrication: SolidWorks CAM, CNC Router, shop tools, etc.
Prototyping: FDM Printing, SLA Printing
Electrical: KiCad, LTspice, Soldering, PCB design, Telecommunications Cabling, Wire Harness Design
Computer Systems: Windows, Mac, Linux, CiscoCLI, SSH
Robotics: Subsystem Integration, AprilTags, SLAM navigation

Experience

Robotics Lab Research Assistant | WPI RoboCare Lab, Dept. of Robotics Engineering **Sept 2026 – Present**

- Communicates human-robot interaction study overview to test subjects
- Collects and logs test subjects' data on their experience with differing robot personality types
- Collaborate with research staff to coordinate study testing sessions
- Works with assistive care robot to preform structured routines with test subjects

Janus: Canvas-Outlook Integration | Personal Project **May 2026**

- Created a python application to retrieve coursework due dates from Canvas and create Outlook Calendar Events
- Navigated Azure API and Canvas API backends to ensure events were properly created, logged, and correct

Project Manager and Team Projects Lead | *FIRST* Robotics Competition Team #5461 **Oct 2021 – Jul 2025**

- Led a team of 18 through the engineering design process including, requirement analysis, design, manufacturing, testing, and deployment over 12 weeks
- Competed for 4 years developing robots with functions such as: climbing, balancing, shooting, and object placing
- Rapidly developed dynamic subsystems and integrated them with other subsystems
- Modeled components for manufacturing on CNC router, CNC Mill, non-CNC mill, and standard shop equipment
- Conducted reliability testing and criteria/cost benefit analysis on manufactured and assembled components
- Implemented autonomous robot capabilities including, April Tag localization, autonomous movement, Inside-out Simultaneous Localization and Mapping (SLAM)
- Designed user interface for real time data collection Application

Information Technology Intern | Boise Independent School District **Jan 2024 – May 2025**

- Worked with an experienced IT team to manage, maintain, repair, and deploy student and faculty devices
- Worked independently, prioritizing daily tasks to maintain workflow while communicating with end users
- Encountered a wide range of technology-related issues and successfully implemented solutions on a wide range of device formats and brands (Cisco, Windows, Google, Android, Apple, HP)

Certifications and Awards

- Information Technology Specialist - Device Configuration and Management | Certiport
- Information Technology Specialist - Networking | Certiport
- Skills USA Idaho Telecommunications Cabling | Silver Medalist
- FIRST Robotics Competition Leadership Award | Finalist
